### **Part III DETAILED ACTION**

Claims 1-20 are currently pending.

#### **Restriction Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 , drawn to method of treatment inflammatory bowel disease, classified in class 514, subclass 02.
- II. Claims 7-18, drawn to method of decreasing small intestine damage, classified in class 514, subclass 02.
- III. Claims 19,20, drawn to HGF composition, classified in class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

The methods of use of Groups I and II are drawn to treatment of patentably distinct disorder conditions and are patentably distinct because the disorder conditions have different mechanisms of development and etiology, and the methods of treatment have different enablement requirements. The groups require different

Art Unit: 1631

literature search and a reference teaching treatment of one disorder will not necessarily teach treatment of another disorder.

Inventions III and I-II are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different methods of treatment, e.g., treatment of glaucoma (see US Patent 5,686407, for example).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Borin whose telephone number is (703) 305-4506.
